EXPERIENCE

Terumo Medical Corporation   Toronto, ON
Junior Systems Analyst   *Mar 2022 – Present*

- Tested, maintained, and optimized the Contracts and Pricing System (CAPS) using ASP.NET and C#, improving system performance and user experience.
- Communicated regularly with project stakeholders, delivering detailed updates on testing progress, issues, and risks to ensure transparency and effective collaboration.
- Developed and implemented SOPs for testing and issue resolution, streamlining workflows and boosting team productivity.
- Led the Audio-Visual Upgrade Project for conference rooms across Canada, delivering the project on time and within budget, while enhancing the functionality and experience for end-users.
- Diagnosed and documented over 250 IT issues, leading to improved system performance and streamlined access, resulting in increased operational efficiency across the organization.

EDUCATION

Toronto Metropolitan University   Toronto, ON
BSc in Computer Science (Hons) (GPA: 3.97/4.33)   *Graduation Date: May 2023*

- Graduated with Distinction; Dean's List: 2019 – 2023

PROJECTS

Portfolio Website | Tech Stack: *Next.js, TypeScript, Tailwind CSS, ShadCN UI, Framer Motion, GitHub*

- Designed and implemented a high-performance portfolio website showcasing skills and projects.
- Integrated dynamic animations using Framer Motion and ShadCN UI components, enhancing user experience.
- Deployed the site on Vercel with Cloudflare DNS for optimized domain resolution while utilizing Vercel Analytics for ongoing performance enhancements that resulted in an overall site performance increase of 16%.
- Managed version control using GitHub for seamless code management.

Project Task Management Tool | Tech Stack: *Python, FastAPI, React.js, TypeScript, MongoDB, GitHub, JIRA, Confluence, Agile*

- Designed and developed a task management tool, leveraging Agile methodology for efficient project planning.
- Facilitated daily standup meetings and optimized product and sprint backlogs in JIRA and Confluence, enhancing stakeholder engagement through improved communication and transparency.
- Engineered a responsive user interface using React and TypeScript with an integrated kanban board and an API backend using FastAPI for efficient data retrieval and manipulation.
- Implemented Firebase Authentication and MongoDB for data storage, improving performance by 15%.

Cypress Web Application | Tech Stack: *Python, Django, Bootstrap, Google Maps API, GitHub*

- Designed and developed a web application for reporting road infrastructure problems.
- Utilized Django web framework and Bootstrap for styling to create an accessible UI.
- Implemented Google Maps API allowing users to pinpoint the exact location of problems.
- Conducted code reviews and provided feedback to team members, resulting in an increase in code quality.

SKILLS

Languages: Python, JavaScript/TypeScript, HTML/CSS, TailwindCSS

Databases: MySQL, SQL Server, MongoDB

Frameworks: React.js/Next.js, Agile Methodology

Tools: Git/GitHub, Docker, Visual Studio Code
